- 25 mm (1 inch) travel
- Precision pre-loaded ball bearing slides
- Choice of 4 different actuator types
- One piece machined aluminum body
- Tracking accuracy 4  $\mu\text{m}$
- 1/4-20 (M6) hole patterns

Ealing's MacroMech stages are designed for positioning medium weight loads with a high degree of accuracy and stability. All 25 mm linear stages feature a positioner body machined from a single piece of aluminum, providing exceptional rigidity. High accuracy and smoothness of operation are achieved by the use of pre-loaded, high precision ball bearing slides, individually adjusted and tested during assembly. Spring-loaded guides maintain contact between translation stage and actuator driving head, ensuring minimal 'stiction' and backlash.

MacroMech 25 mm linear stages are supplied with either a thumbscrew drive actuator or with a micrometer which is clearly marked for 0.01 mm accuracy over the full 25 mm of travel

(1/2 division is equal to 5  $\mu\text{m}$ ). The micrometer drive can be easily removed from the stage. It can then be replaced with either a MotorDriver or EncoderDriver Actuator.
