MPL1510 series DPSS passively Q-switched sub-nanosecond lasers deliver high peak powers at 100 Hz repetition rate. Short laser cavity with the fiber pumped technology is fixed on thermo-stabilized and controlled baseplate which gives extremely stable output parameters performance. Small footprint is welcome point for integration into OEM lasers. Sub-nanosecond pulse duration of < 600 ps, high pulse energy more than 1 mJ, variable repetition rate from 1 to 100 Hz covers many applications like pollution monitoring, DNA analysis, supercontinuum generation and many others.

Different models operate with repetition rates up to 100 Hz and the average power ranges

from 100 to 250 mW. Optional conversion to green (532 nm) and ultraviolet (355 & 266 nm) is also available.
