# **EC0165LM Series**

## Mechanical Bearing, Linear-Motor Stage

High-performance in a cost-effective, economic package

**Rugged mechanical design** 

Direct-drive linear motor for precision motion

Eight models with travels from 100 mm to 600 mm

The ECO165LM series, part of the ECO linear stage family, builds upon Aerotech's long tradition of producing low total cost of ownership motion designs. Excellent positioning specifications, high stiffness, and a variety of options and features combined with economic pricing make ECO165LM stages an ideal choice for mediumperformance production applications.

## **Quality Mechanical Construction**

A long-life recirculating linear guide bearing system and quality construction make the ECO165LM an attractive solution for applications where uptime is critical. Unlike low-cost competitive motion stages, the ECO165LM can be integrated into complex machines with the assurance it will perform at a high level and outlast other machine components.

## **Precision Motion Performance**

EC0165LM series stages are optimized with high precision, noncontact linear encoders. Precision recirculating linear bearings, along with Aerotech's machining and assembly craftsmanship, enable the best geometric performance per unit price on the market.

The precision noncontact encoders enable minimum incremental motion to 10 nm with micrometer-level repeatability. The optional HALAR factory calibration improves positioning accuracy to  $\pm 1.5 \ \mu m$ .

## **Direct-Drive Linear Motor**

The ECO165LM comes standard with Aerotech's fieldproven linear motor technology. It is available with a highperformance linear-motor option for applications requiring higher force and acceleration motion profiles. In both cases the ironless forcer coil provides high force with zero cogging for super-smooth velocity and position control. This ironless design is ideal for applications requiring outstanding contour accuracy and smooth velocity profiling. As with all Aerotech linear motor stages, the linear motor has zero backlash, no windup, zero friction, and excellent dynamic responsiveness.

## **Design and Integration Flexibility**

The ECO165LM is available in eight different models with travels ranging from 100 mm to 600 mm and speeds up to 2 m/s. Configurable cable management solutions are available for single and multi-axis systems as standard options.

The base mounting holes are accessible from the outside of the stage for easy mounting. Standard mounting holes for both English and metric optical tables are present in all travels. Tabletops are available with both English and metric mounting patterns. Tabletop hole patterns allow the direct attachment of several types of Aerotech rotary stages.

The ECO165LM stage is a flexible, yet cost-effective, linear motion stage with many options to fit the exact needs of the application. It is easily the best performing and most versatile linear stage per unit price that money can buy.

Notes:

Notes:
Certified with -PL1 option.
Requires the selection of an appropriate amplifier with sufficient voltage and current., and is dependent on motor selection.
Axis-orientation for on-axis loading is listed.
Specifications are for single-axis systems measured 25 mm above the tabletop. Performance of multi-axis systems is payload and workpoint dependent. Contact factory for multi-axis applications.

#### EC0165LM Series DIMENSIONS

## EC0165LM Series Accessory Tabletop DIMENSIONS

## **EC0165LM ORDERING INFORMATION**

## Travel (Required)

-0100	100 mm travel stage
-0150	150 mm travel stage
-0200	200 mm travel stage
-0250	250 mm travel stage
-0300	300 mm travel stage
-0400	400 mm travel stage
-0500	500 mm travel stage
-0600	600 mm travel stage

#### Motor (Optional)

-M1	Standard motor option
-M2	High performance motor option

#### Tabletop (Optional)

-TT1	Tabletop with metric dimension mounting
-TT2	Tabletop with English dimension mounting
-TT3	Accessory tabletop with mounting for select rotary stages

#### Feedback (Required)

-E1	Incremental linear encoder, 1 Vpp
-E2	Incremental linear encoder, 0.1 $\mu m$ digital TTL output

#### **Cable Management (Required)**

-CMS0	No external CMS, motor/feedback connector bracket on carriage
-CMS1	External CMS for single axis
-CMS2	External CMS for lower-axis of two-axis ECO (XY) assembly
-CMS3	External CMS for lower-axis of two-axis (XZ or XT) assembly
-CMS4	External CMS for upper-axis of two-axis ECO assembly

#### Lifting Hardware (Optional)

-LF

#### Lifting hardware

NOTE: Lifting option only available on travels 400 mm and greater. Lifting should never be ordered on the upper-axis of an XY set (only order on lower-axis).

#### Metrology (Required)

-PL0	No metrology performance plots
-PL1	Metrology, uncalibrated with performance plots
-PL2	Metrology, calibrated (HALAR) with performance plots

## EC0165LM ORDERING INFORMATION

#### Integration (Required)

Aerotech offers both standard and custom integration services to help you get your system fully operational as quickly as possible. The following standard integration options are available for this system. Please consult Aerotech if you are unsure what level of integration is required, or if you desire custom integration support with your system.

	Integration - Test as system
-TAS	Testing, integration, and documentation of a group of components as a complete system that will be used together (ex: drive, controller, and stage). This includes parameter file generation, system tuning, and documentation of the system configuration.
	Integration - Test as components
-TAC	Testing and integration of individual items as discrete components. This is typically used for spare parts, replacement parts, or items that will not be used or shipped together (ex: stage only). These components may or may not be part of a larger system.

#### Accessories (to be ordered as a separate line item)

ALIGN-NPA	Non-precision XY assembly
ALIGN-NPAZ	Non-precision XZ or YZ assembly
ALIGN-PA10	XY assembly; 10 arc sec orthogonality. Alignment to within 7 microns orthogonality for short travel stages.
ALIGN-PA10Z	XZ or YZ assembly with L-bracket; 10 arc second orthogonality. Alignment to within 10 microns orthogonality
	for short travel stages.
ALIGN-PA5	XY assembly; 5 arc sec orthogonality. Alignment to within 3 microns orthogonality for short travel stages.
ALIGN-PA5Z	XZ or YZ assembly with L-bracket; 5 arc second orthogonality. Alignment to within 5 microns orthogonality for
	short travel stages.
