

Precision Gonio Stage | PG-50PM

NEW

The PG-50 gonio stage performs best in limited space applications due to its compact design. High stiffness motion is achieved through pre-loaded crossed-roller bearings. These stages may be mounted in an orthogonal, space-saving arrangement to achieve pitch and roll adjustment. Versions capable of operation in vacuum (10^{-9}) are available. The PG-50 is compatible with the MMC-103 and MMC-110 controller.
